In case of an emergency I can be reached at Home: _____	
Work: _____	Other: _____

**Pre-Anesthetic Bloodwork**

If your pet is undergoing an anesthetic procedure, rest assured that advances in anesthesia, anesthetic monitoring, and surgery have made procedures safer with a low rate of complications. Nevertheless, some obscure conditions can be detected only by diagnostic testing. Because of this, we recommend various pre-anesthetic screening tests:

For pets less than 7 years of age the cost is \$78.00 for a Pre-Anesthetic Blood Panel.  
For pets less than 7 years of age the cost is \$104.00 for a same day Small Blood Panel.  
For pets greater than 7 years of age the cost is \$169.00 for a Senior Wellness Profile.  
I have been advised of this additional cost and consent to having these tests performed.  
Please initial here YES \_\_\_\_\_ NO \_\_\_\_\_

**Deciduous (Retained) Baby Teeth**

Small breed pets often suffer from retained deciduate (baby) teeth after their adult teeth grow in. This condition creates overcrowding of teeth, retention of food, debris between the teeth, and tarter buildup. This, in turn, leads to bad breath and damage to gums and adult teeth. We strongly recommend that these deciduate teeth be extracted while your pet is under anesthesia to avoid future complications. The cost for this procedure varies based the number of teeth extracted and generally costs \$15.00 per tooth if the patient is already under anethesia for another procedure.

If my pet has this condition I consent to have this procedure performed – please initial  
YES \_\_\_\_\_ NO \_\_\_\_\_

**Microchipping**

Microchipping pets involves inserting a tiny rice-like microchip under your pet’s skin. This chip then holds your pet’s identity for life. If your pet is ever lost and a local shelter or veterinary practice finds it, the law requires that all pets be scanned for a microchip before they are adopted out or euthanized.

The cost for this procedure is \$40.00  
I agree to have a microchip inserted – please initial YES \_\_\_\_\_ NO \_\_\_\_\_

**Nail Trimming**

Nail Trims are very beneficial to your pet in the sense that they will be less likely to be snagged on carpets, loose ground, etc. Keeping the nails properly trimmed can also prevent painful ingrown nails, especially on dewclaws if your pet has them. Having your pet's nails trimmed under anesthesia requires less restraint and is much less stressful to them.

Discounted price for nail trims done if already under anesthesia for another procedure is \$10.00.  
I agree to have my pet's nails trimmed - please initial YES \_\_\_\_\_ NO \_\_\_\_\_
